

MINING NEWS

STILL BUYING MINING GROUND

Bingham-New Haven Company
Lands Davis-Gebhardt Group.

CALIFORNIA SAVES ITSELF

MANAGER J. J. DALY ON DALY-JUDGE CONDITIONS.

From the Bingham Central Mining & Milling company, owner of the well known Davis & Gebhardt group, the Bingham-New Haven company, which acquired a bond on the entire block of ground comprising sixteen patented claims, covering all of 200 acres. The consideration was withheld, but judgment from the figures placed upon it when it was filed last May by E. B. Mellen and others of Cambridge, Mass., it is safe to say that the Bingham-New Haven company will have to present the Davis & Gebhardt group during the two years it is allowed to complete the purchase.

Included in the group, which will round the purchasing company's possessions out to more than 200 acres of the richest kind of mineral-bearing ground, is the famous Burning Mountain, the Elephant, Bonham and other well known early-day producers of the camp which have records of selling more than \$1,000,000 worth of ore.

The purchase of this group of claims by the Bingham-New Haven company will make the Davis & Gebhardt group, which it adjoins on the south. The completed block fills the gap between the Davis & Gebhardt group and the United States company, while it wedges into the Boston Consolidated group on the north. The Bonham claim is known to carry the same ledge and precisely the same character of ore as that found in the Boston Consolidated, while the Burning Mountain, Elephant and others have been noted for their production of lead-silver-gold ores.

More good news is promised by the Bingham-New Haven company in the near future, but as yet the management is unwilling to release it.

CALIFORNIA PAYS \$5,000.

Now Has a New Lease of Life For Ninety Days.

Thursday, Sept. 1, was the day set for the California Mining company to pay over to W. W. Armstrong the \$5,000 necessary to redeem its property, but connections were not made, the expected money being not forthcoming from the source that Manager W. L. Snyder had relied upon to put it up. He went to Mr. Armstrong and secured a day's grace, and Friday evening again met Mr. Armstrong and handed over \$5,000, or one-third of the amount due. The sum was accepted and the management of the California company succeeded in obtaining a ninety days' extension on the remainder.

Mr. Snyder stated yesterday that new blood was being secured for the California company, and he expected to discharge the remainder of the indebtedness and regain title to the property before the end of the present month. He stated that Lee Mantle of Butte had just added to his holdings in the company, so the presumption is that he was the man who put up the \$5,000 over to Mr. Armstrong Friday evening.

With the payment just made and the extension secured the California company gets a new lease on life, though what will be done with the ground after it has been redeemed is not yet apparent. During the present summer a few men have been engaged in development work and the statement has been repeatedly made that the mill would be started up on ore, large bodies of which were blocked out in the mine. But the mill did not start and it is not likely that it will for some time to come, at least.

MAJESTIC TO SHIP ORE.

News From Camp is of Most Assuring Nature.

Advices from W. B. Mucklow, president of the Majestic Copper Mining & Smelting company, who has been spending the past week at the company's properties in Beaver county, are to the effect that he will reach this city next Wednesday morning. He writes that the present outlook is fine and that a good shipment of ore will be made in the near future, just to show that the mines are still there. No intimation of what work has been done was contained in Mr. Mucklow's letter and neither did he say from which of the mines the shipment would be made. It is known, however, that the O. H. Hickory, O. K. and Harrington-Hickory have each been receiving attention at the hands of Superintendent Ed F. Freudenenthal and the results of development are understood to have been anything but discouraging at any of them.

ORE AND BULLION.

Production of Custom and Copper Smelters is Normal.

Ore and bullion settlements in the open market during the past week, as reported by McCormick & Co., amounted to \$385,000, yesterday's proportion of the total being \$33,200, as follows: Silver, lead, gold and copper ores, \$34,000; base bullion, \$49,200.

OIL AND ASPHALTUM COMPANY.

Simon Bamberger and Others to Operate in Box Elder County.

For the purpose of operating oil and asphaltum lands on the lake shore in Box Elder county, the Bonneville & Asphaltum company has organized and filed articles with the county clerk. The company is capitalized at \$100,000, the shares having a par value of 10 cents each. Simon Bamberger is president; J. S. Gordon, vice president; E. B. Critchlow, treasurer; E. A. Wait, secretary. These, with U. W. White and Thomas E. Black forming the board of directors.

MINES OF TINTIC.

Little Chief Machinery Breaks Down—Machine Men Get Advance.

(Eureka Reporter.) The pay of machine men at the Centennial Eureka mine has been raised from \$2.75 to \$3 per day, effective after the first of the present month. James Sneddon arrived in Eureka Tuesday from American Fork canyon, where he has been doing assessment work on some mineral ground in which he is heavily interested. Mr. Sneddon will remain in Eureka for a few months.

The Little Chief mine has been closed down for the past few days on account of a break in the machinery which necessitated the sending away for some new castings. A survey was made of the underground workings last Wednesday and Superintendent

CONCERNING DALY-JUDGE.

Manager Daly Tells of Changes Shown by New Development.

To size up conditions and leave final instruction before leaving on a month's trip to the St. Louis exposition and the east, Manager John J. Daly, yesterday afternoon, while accompanied by Director John W. Donnellan, asked for a statement of some kind concerning the property yesterday, Mr. Daly said:

"I can only say to you, as I have often said before, that there is nothing out of the ordinary to report from the mine. We are steadily pursuing the plan of development decided upon several months ago, and up to the results have been all that I anticipated. The drift west on the 1,400-foot level is the farthest out into new territory we have ever reached. In fact, 1,700 feet we have had ore almost continuously in greater or less quantity. No attempt has yet been made to see what there is either above or below the level, the face of which is now all of 1,700 feet beneath the surface, and driving straight ahead will likely be the order for some time to come. I was never more sanguine of ultimate results, but there is no use in retelling information concerning conditions which are only partially demonstrated at this time. We have good cause to be encouraged over the outlook for the future, but there is nothing as yet to get excited over."

One feature of the development of the south and southwestern portion of the company's domain which is particularly gratifying to Manager Daly is the fact that the zinc-bearing zone has been left behind, the ore now being encountered carrying from nothing to less than 2 per cent of that troublesome metal. In its place gold is being found in high percentages, accompanied by some iron, and Mr. Daly is confident that there is a long stretch of country ahead in which little if any zinc will be found in combination with the other metals. Illustrating what the zone has shown, Mr. Daly said:

"The time was when the Ontario mine was known as a free-milling silver proposition. The ores carried very little lead and no zinc. As the ground was opened toward the Daly mine, lead appeared and a depth some 200 feet more lead accompanied the silver in the Daly and, when the territory of the Daly-West was opened, it was found that the character of the ores had so changed that from free-milling silver in the Ontario, and silver-lead in the Daly, they had a right to be classed as lead-silver ores in the Daly-West. Still farther west in our property, the old Anchor, the change was so great that, to properly designate the character of the ore, lead was the term required. Now, as we go west from these old Anchor workings, it is found that the zinc percentage grows perceptibly less until, in the extreme western portion of the ground which has thus far been penetrated, little or no zinc is found. The silver and lead values are increasing, rather than diminishing, while the ore is also carrying very substantial values in gold, associated with a fair per cent of iron. We are certainly in a most interesting country, and I like the outlook."

GOLDFIELD'S GOLD BOOM.

How News of the Sandstorm Strike Was Received Here.

News of the startling discovery of gold in the Sandstorm property, in the Goldfield district, Nevada, given yesterday, was the cause of great excitement among the men who are familiar with mining gold ores were prepared to believe that forty feet of \$6,000 rock had been uncovered, and most of them considered that it would be remarkable if four feet of such ore existed in the vein.

A great many Utah mining men and engineers have been in the Goldfield camp, and there is none of them but what have and do entertain the belief that the section is a wonder and that it will produce an enormous amount of gold, but they point out that gold rarely, if ever, is evenly distributed through the formation in which it is found.

All previous discoveries in the new camp have shown that the richest rock makes in streaks either alongside or through bodies of less value, and none of them think other than that such will prove to be the case in the Sandstorm. The news, however, has resulted in awakening a great deal of interest and it is safe to say that some of the propositions in which Salt Lake are interested will receive closer attention from now on, while a number of operators or their representatives will be pulling out for the diggings very soon.

The story printed yesterday gave the location of the strike as being close to the town of Goldfield. Such is not the case. The property is located at the northern base of a rather high hill known as Columbia mountain, and all of four or five miles north of Goldfield, and not far from Diamondfield.

On the eastern slope of Columbia mountain is the property of the Goldfield-Vindicator, in which Professor Tibbals and others of this city are interested. Assays on croppings from a new ledge just found on that property show \$3.75 in gold and 1.2 ounces silver per ton, and great deal of work is being going on on that side of the mountain and the word from camp is that some big strikes are going to be made there in the near future, as the same conditions found on the western side of Columbia and Vindicator mountains are being gradually unfolded on the east. Great strikes have now been made at points ranging from southeast of Vindicator mountain, near Goldfield, clear around to the west and on to a point northeast of Columbia mountain, leaving only about one-third of the circle round them to be proven up.

MINING STOCK EXCHANGE.

Week Closes on Light Business and Featureless Market.

The week on the mining exchange closed with total sales amounting to \$5,322 shares of stock, with a selling value of \$21,761.75, the final bid bringing out 22,200 shares, which sold for \$3.25. As the market has been featureless, as well as generally remained firm, and in some instances advances have been scored. Park City stocks have been usually quiet. In fact, trading in all lines has been of the spasmodic kind, a stock deal in one day generally being relegated to the rear on the next. Buying orders of any importance have been variably resulted in putting the stock wanted on several points.

Carissa, Century, Consolidated, Mercur, Sacramento, Salt Lake Consolidated, Utah Sam, Tetra and Yankee have managed to break about even on the week, while May Day, Mammoth and two or three others have shown more than ordinary strength. Daily-West has not sold under \$3.50 and has been up to \$3.75. The property has been developed by an incline shaft, but it is the intention of the owners to put up a small hoist, blacksmith shop and other necessary buildings and to sink a perpendicular shaft for the purpose of tapping the vein at a depth of 200 feet. The incline shaft through which the ore has been developed has opened up some nice looking rock and there is every reason to believe that at a depth of about 200 feet some nice ore of shipping grade will be encountered.

Columbus Consolidated has been active on the open board at prices ranging between \$1.30 and \$1.40, while on the other hand, a little Goldfield Bonanza has gone at \$1. The market has not been open to make comparisons of value to its character, nature, though aside from the lack of interest shown in it, there has been nothing particularly noteworthy about it. Following is the list of final quotations and record of sales made at yesterday's single session:

Bingham Mining Notes.

(Bingham Bulletin.)

The addition to the Oho's mill in which the new Wilfries will be placed is under active construction. The new mill, which started up a few days ago, is reported to be running very successfully. F. B. Wilfries is the superintendent.

In a few days the Highland Boy will be receiving lumber and timber at the rate of ten cars a month, including 5,000 feet of lagging, 1,000 posts, 1,000 caps and 1,000 braces.

Jerry Schenck, former manager of the Dalton & Lark, took many thousands of tons of what would have been good pay ore with economical handling, from the Dalton mine, and the fact was demonstrated that the ore shot went to the deep and lengthened as it went by prospecting from the level.

Working in the Dalton vein, the Bingham Con. management is now opening up what will prove the big bonanza of the Bingham's holdings.

J. W. Cairnes and D. M. Kennedy are working under bond the old claim on the west side of the main canyon near the Bingham hotel, that in 1873 shipped high grade ore—some of it carrying as high as 14 1/2 per cent gold. The property has been in several hundred feet that was badly caved. This has been caught up and leached out of the mine, and the three-foot streak of ore is exposed that carries 4 per cent from 62 per cent copper and some silver, and it is safe to say that it will net about \$8. A pile of the stuff is on the dump and a shipment will be made next week.

The proposed new track and car, also an ore bin, and will be actively operated. The property is being developed by an incline shaft, but it is the intention of the owners to put up a small hoist, blacksmith shop and other necessary buildings and to sink a perpendicular shaft for the purpose of tapping the vein at a depth of 200 feet.

The Pioneer sampler yesterday reported the receipt of four cars of ore from the Big Cottonwood property during the month of August. The best record the mine ever made, but not better than it is destined to make before long, judging from reports which come from the mine.

P. L. Kimberley, president of the Hon. Mining company, expressed himself yesterday as being very much pleased with the condition in which he found the property. Accompanied by Frank H. Buhl and brother he will leave for the east today noon.

year. The daily average of bank clearings last week was \$13,000,000, or \$27,000,000 more than in the previous week. The clearing on Saturday, reflecting Friday's business, were \$13,150,000, much above the average. Comparisons show that eight banks expanded loans of seventeen and two-fifths millions net; nine banks indicated a decrease in cash of seven and one-fifth millions net; two of the larger institutions contributed \$11,000,000 to the increase in loans, and three banks lost together ten and one-fifth millions cash.

Blanks for assessments and delinquent notices intended for publication in The Herald will be furnished free upon application to this office.

MINING EXCURSION

To Bingham, Sunday, Sept. 4.

Leave D. & R. G. Depot 8:30 a. m. returning leave Bingham 4:40 p. m. and midnight. Best chance of the season to see the big producers.

CALIFORNIA EXCURSIONS.

Aug. 16 to Sept. 11, inclusive.

Via Oregon Short Line. Round trip to San Francisco on Los Angeles, both ways via Ogden, \$36.50. Going via Ogden and returning via Portland or vice versa, \$47.50. Limit Oct. 23rd. See agents for full particulars.

Back to School Again

Here it is September again and your boy must have some good clothes. AT BARTON'S STORE you can get

Good School Clothes

The satisfying kind, with all the style features to please the boy, and the solid, substantial wear the parents always insist upon.

School Suits at \$2, \$2.50, \$3, \$4, \$5.

ONE PRICE STORE.
BARTON & CO. 45-47 Main St.

SENATOR MARTIN SAYS:

United States Senate, Washington, D. C.
I have used HAYNER WHISKEY for medical purposes in my family and have found it very satisfactory. I believe it to be a number one medicinal whiskey.

Thomas J. Martin
U. S. Senator from Virginia

THE ONLY WHISKEY WITH A NATIONAL REPUTATION FOR HIGHEST QUALITY AND PERFECT PURITY.

We have one of the largest distilleries in the world. We are the largest bottlers of whiskey in the world. We have more whiskey in our eight Bonded Warehouses than any other distiller in the world. There is more HAYNER WHISKEY sold than any other brand of whiskey in the world. We have been in business for 38 years and have a capital of \$500,000 paid in full, so you run no risk when you deal with us. Your money back at once if you are not satisfied. Don't forget that HAYNER WHISKEY goes direct from our distillery to you, with all its original strength, richness and flavor, thus assuring you of perfect purity and saving you the enormous profits of the dealers. You can't buy anything purer, better or more satisfactory than HAYNER WHISKEY, no matter how much you pay.

DIRECT FROM OUR DISTILLERY TO YOU
Saves dealers' profits. Prevents adulteration.

HAYNER WHISKY

4 FULL QUARTS \$4.00
EXPRESS CHARGES PAID BY US

OUR OFFER We will send you FOUR FULL QUART BOTTLES OF HAYNER SEVEN-YEAR-OLD RYE for \$4.00, and we will pay the express charges. Try it and if you don't find it all right and as good as you ever used or can buy from anybody else at any price, then send it back at our expense, and your \$4.00 will be refunded to you by next mail. I think that offer over. How could it be fairer? If you are not perfectly satisfied you are not out a cent. We ship in a plain sealed case, no marks to show what's inside.

FREE CORKSCREW SENT WITH YOUR ORDER
Remember, a Hayner cask is an honest quart of 32 ounces, 4 to the gallon, just one-fourth more than in bottles of other brands, really reducing our price just that much.

ESTABLISHED 1866. THE HAYNER DISTILLING COMPANY
411 ST. LOUIS, MO. ST. PAUL, MINN. DAYTON, O. ATLANTA, GA. DISTILLERY, TROY, O.

Are Quickly and Forever Cured by the Grand Product of Nature
Dr. McLaughlin's Electric Belt

Free Electric Suspensory for Weak Men

This Electric Suspensory carries the current direct to the weak parts and cures all weakness of men, varicocele, etc. It develops and expands all weak organs and stops physical decay. No Case of Falling Varicocele, or Debility can resist the powerful Electric Suspensory. It never fails to cure. With Belts for weak men no charge.

No man should be weak; no man should suffer the loss of that vital element which renders life worth living. No man should allow himself to become less a man than nature intended him; no man should suffer for the sake of his youth when there is here at hand a certain cure for his weakness, a check to his waste of strength.

Most of the pains, most of the weakness of stomach, heart, brain and nerves from which men suffer are due to an early loss of nature's reserve power through loss of vitality and affects every organ of the body. It can be restored. The very element which you have lost you can get back, and you may be as happy as any man that lives.

My Electric Belt, with Special Electric Suspensory, will restore your strength. It will check all unnatural drains and give back the old vigor of youth.
